Experience

Backend Developer & DevOps Engineer Edmonton, AB

18 Studio Web Agency | Python, Java, GitHub Actions, Terraform, AWS, Azure *June 2025 – Present*

- Developed RESTful backend services with Django and Spring Boot, integrating PostgreSQL with secure and optimized SQL schemas.
- Automated CI/CD workflows with GitHub Actions and Docker, including pytest and JUnit test runs, deploying containerized applications to a Kubernetes cluster.
- Provisioned AWS and Azure infrastructure using Terraform, applying Infrastructure as Code for scalable and reproducible deployments.
- Integrated AI coding assistants and LLM tools into daily workflows to accelerate backend delivery and automate DevOps tasks.
- Collaborated directly with a small client team across feature delivery, deployment, and ongoing support.

Backend Developer

VNPT | Python, Java, Docker, GitLab CI/CD *Jan 2023 – Aug 2023, May 2024 – Dec 2024*

- Containerized applications with Docker and implemented automated pipelines using GitLab CI/CD to streamline testing and deployment workflows.
- Built APIs with FastAPI and Spring Boot to support data processing, reporting, and internal service integrations.
- Optimized PostgreSQL performance through schema improvements and query tuning, improving data access speed and reliability.
- Collaborated with senior engineers, QA, and business analysts on system design discussions, testing, and peer code reviews during feature delivery.

Projects

Kubernetes Platform with GitOps Delivery and Observability (GitHub)

Kubernetes, ArgoCD, Helm, Ansible, Grafana, Prometheus, OpenTelemetry, GitHub Actions

- Provisioned a two-node K3s home lab cluster with Ansible and managed all workloads through ArgoCD using an app-of-apps GitOps pattern with automated sync and self-heal, keeping cluster state in Git.
- Built Helm charts for a Spring Boot API and Oracle database with autoscaling and health probes; automated testing, chart validation, and image publishing with GitHub Actions.
- Built CI/CD in GitHub Actions that runs integration tests against a real Oracle container, lints and renders the charts, and publishes versioned images to GHCR.
- Implemented unified metrics, logs, and traces with Prometheus, Loki, Tempo, Grafana, and OpenTelemetry, correlating all three signals in a single Grafana view.

Technical Skills

Programming Language: Python, Java, Rust, C++, TypeScript, JavaScript, HTML, CSS
Database Management: PostgreSQL, MySQL, Oracle, MongoDB, Firebase
DevOps & Cloud: Git, Docker, Kubernetes, ArgoCD, GitHub Actions, GitLab CI/CD, Ansible, Terraform, AWS, Azure
Observability: Prometheus, Grafana, Loki, Tempo, OpenTelemetry

Certification

Certified Kubernetes Administrator (CKA) [2026]
AWS Certified Solutions Architect – Associate (SAA-C03) [2026]
AWS Certified Developer – Associate (AWS DVA-C02) [2026]
Microsoft Certified: Azure Administrator Associate (AZ-104) [2026]

Education

University of Alberta Edmonton, AB

Bachelor of Science in Computer Engineering (Co-op), Software Option *Sep. 2020 – May 2025*
